PROFILE INFO

Final-year Digital and Communication Engineering student (GPAX 3.09) with hands-on programming experience across AI, computer vision, embedded systems, and interactive software projects. Comfortable working across the full project cycle — from hardware/data integration to application logic — using JavaScript, Python, and C/C++. A fast learner who picks up new languages and frameworks quickly, eager to apply this foundation and grow into a Software Engineer role.

ACADEMIC PROJECTS

GestureTalk (Senior Project)

- Built a real-time Thai hand-sign recognition web app: MediaPipe tracks 21 hand landmarks per frame, classified by a neural network exported to JSON and run entirely client-side, with no server.
- Prototyped the classification approach in Python (OpenCV, MediaPipe, scikit-learn) before building the deployable browser version.

PERSONAL PROJECTS

To-Do List — HTML, CSS, JavaScript

- Built a task manager with due dates, filtering, and a progress indicator; state persisted via the localStorage API.

Expense Tracker — HTML, CSS, JavaScript

- Built an income/expense tracker with real-time totals and a category breakdown rendered as a CSS-only bar chart using Array.reduce().

To-Do List (React) — React, Vite

- Rebuilt the to-do app in React, split into five reusable components with state managed via hooks (useState, useEffect).

WORK EXPERIENCE

Part-time Staff – Restaurant

- Maintained service quality and collaborated with a team in a fast-paced environment.

Part-time Staff – Café

- Handled cashier duties and customer communication; developed reliability and attention to detail.

ACTIVITIES

Startup Program Participant

- **Startup Thailand League** Collaborated with a multidisciplinary team to develop innovative startup ideas and presented business models and technology solutions.
- **Research to Market (R2M)** Participated in transforming research concepts into practical business opportunities.

EDUCATION

Mae Fah Luang University
B.Eng. in Digital and Communication Engineering
Currently in Year 4

GPAX: 3.09

TECHNICAL SKILLS

Programming Languages

- JavaScript, Python, C, C#, C++, Java, MATLAB

Frameworks & Libraries

- React, OpenCV, MediaPipe Hands, Unity

Web & Markup

- HTML, CSS

Tools

- Git, VS Code, Arduino, Figma

SOFT SKILLS

- Teamwork
- Problem Solving
- Communication
- Time Management
- Adaptability
- Fast Learner

LANGUAGES

- Thai — Native
- English — Intermediate
